

## 10 goal difference limit rule

To avoid teams giving up in order to have a better goal difference, the following rule will be applied during this tournament:

- If a team wins with more than a 10 goal difference, the goal difference will be then adjusted to a 10 goal difference.
- If a team gives up or doesn't show up to their game: The following will happen after  $\geq 5$  minutes, the opponent team will win with a 10 goal difference.
- If a team doesn't have a working robot for  $\geq 5$  minutes (successional), the opponent team will win with a 10 goal difference.
